

PRINCIPAL'S MESSAGE

Our sole objective is to implement, in to, the curriculum at hand which falls within the purview of the National Education Policy, in an environment made congenial by care and attention. The wide range of functional pattern of the curriculum is aimed to prepare children to acquire basic skills and develop these to further their aims and objectives in life. The breadth of the curriculum also aims to prepare them to successfully meet the future challenges they await in the pursuance of their careers and their quest to achieve qualitative and dignified existence of life. Keeping in view the underlying truth that action is progressive in nature and when consciously performed, leads to perfection; the children are exposed to a host of co-curricular activities wherein they find avenues for the development and exercise of their skills. They also understand the value of hard work and dedication and thus get used to the derivation of satisfaction through work. They are also trained to take up tasks and handle situations with care and confidence. It is absolutely essential on our part to provide an avenue that caters to creating profound images through the involvement and participation of students, teachers, parents and educationists, so as to trigger and ripple the imagination and ability in those who have the sensitivity and understanding to appreciate spontaneous and articulate expression of the body and mind.

Mrs. Shimla Rai

M. A., B. Ed.

(Principal)
